CHANGE IN SCHEDULE

Owing to a delay in making final arrangements, the change of train service had to be postponed for a week.

Taking effect on Sunday Jan. 20th, the trains on this branch will leave Monitor several hours different from the present time.

The westbound train will leave Kerrobert at 5 a. m., leave Monitor at 8.01 a. m., arriving at Lacombe 1.35 p. m. Eastbound train leaves Lacombe at 2.20 p. m., Monitor 8.16 p. m., arrive Kerrobert 11 15 p. m.

GLASSES for Temporary Use

Some eyes do not require the constant wearing of glasses. But—there are thousands of cases where glasses, temporary worn, would relieve discomfort, annoyance and distress.

Favor your eyes with "rest" glasses

ALBERT F. BROWN
OPTOMETRIST
Monitor, Jan. 21, 11.30 a. m. to Jan. 22, 11.30 a. m.

MOTOR VEHICLE ACT, LICENSE FEES, 1918.

The following regulations respecting payment of license fees for automobiles take effect on and after January 1st, 1918.

1. $5 in the case of a motorcycle, and for any other motor vehicle according to the length of the wheel base in inches as follows:

For motor vehicles not exceeding 100 inches	$15.00
Exceeding 100 inches but not exceeding 105 inches	17.50
Exceeding 105 inches but not exceeding 110 inches	20.00
Exceeding 110 inches but not exceeding 115 inches	22.50
Exceeding 115 inches but not exceeding 120 inches	25.00
Exceeding 120 inches but not exceeding 125 inches	27.50
Exceeding 125 inches but not exceeding 130 inches	30.00
Exceeding 130 inches but not exceeding 135 inches	32.50
For every motor vehicle exceeding 135 inches	35.00

2. The foregoing fees shall include the cost of one set of number plates.

3. The fee, payable after October 1 in any year, shall be one-half of the fee above prescribed.

4. Fire engines and fire patrol apparatus, police patrol and municipal owned ambulances shall be exempt from payment of the above fees, but such motor vehicles shall be registered and number plates issued on payment of fee of one dollar for each pair of number plates on filing of the statement required under section 3 of "The Motor Vehicle Act."

E. TROWBRIDGE,
Deputy Provincial Secretary.
Edmonton, December 28, 1917.

THE HERO Fanning Mills

Geo. E. Garries
Deering
Agent

The honor of having the first Board of School Trustees, composed entirely of women, goes to the Gregerson School District a few miles south of town.

At their annual meeting, held last Friday, the following ladies were elected as trustees: Mesdames Alf. Anderson, E. R. Arthurs and R. N. Fleming.

Good eyesight is priceless. We should therefore take no chances by visiting inexperienced fakirs whose first and only desire is to sell a pair of glasses whether correctly fitted or not. Arrangements have been made for Albert F. Brown, O. D. to visit Monitor one day each month. It gives us great pleasure to make mention of Dr. Brown in this issue, and we feel sure that our readers will join in welcoming him an era of ever-increasing prosperity.

Dr. Brown is registered by the Massachusets Board of Registration in Optometry. advt

Dr. Buggins, Dentist, will be in town tomorrow and will stay here for six days.

ANNUAL SCHOOL MEETING

The annual meeting of the Monitor S. D. was held on Monday evening. The Auditor's report showed that the school was in good financial standing and clear of debt. The total taxes collected during the year were $2575.51, including arrears, and the total cash receipts amounted to $3499.84. Total cash payments were $2286.87, leaving a balance on hand of $1212.97.

The taxes in arrears amount to $1727.70, and the total assets are $3795.02. The report shows that the cost of operating the school during 1917 was $1556.94.

There was very little discussion at the meeting, altho the idea of a consolidated school was talked of.

H. McCarron and W. S. McCulloch are the new trustees for this year.

Ten ships, including two fishing boats, were sunk last week, by mines or subs.

All industries not producing foods, east of the Mississipi River, have been closed, in the U.S. owing to the coal shortage.

STRAYED

1 white horse, 8 years old, weight about 1500 lbs. 1 steel gray horse, 4 years old, 1350 lbs. 1 bay horse, 4 yrs old, 1350 lbs. 1 light gray pony, 12 yrs old, 700 lbs.
Suitable reward for information leading to recovery.

T

Featherstone Changes His Plans

T'was getting dark and a keen wind blew across the ragged pines beside the track, when Jake Foster walked up and down the station at Gardner's Crossing in North Ontario. Winter was moving southwards fast across the wilderness that rolled back to Hudson's Bay, silencing the brawling rivers and calming the stormy lakes, but the frost had scarcely touched the sheltered valley yet and the roar of a rapid throbbed among the trees. The sky had the crystal clearness that is often seen in northern Canada, but a long trail of smoke stretched above the town, and the fumes of soft coal mingled with the aromatic smell of pines. Gardner's Crossing stood, an outpost of advancing industry, on the edge of the lonely woods.

The blue reflections of big arc-lamps quivered between the foam-flakes on the river, a line of bright spots, stretching back along the bank, marked new avenues of wooden houses, and, across the bridge, the tops of tall buildings cut against the glow that shimmered about the town. At one end rose the great block of the Hulton factory, which lost something of its utilitarian ugliness at night. Its harsh, rectangular outline faded into the background of forest, and the rows of glimmering windows gave it a curious transparent look. It seemed to overflow with radiance and filled the air with rumbling sound.

In a large measure Gardner's Crossing owed its rapid development to the enterprise of the Hulton Manufacturing company. Hulton was ready to make anything out of lumber for which his salesmen found a demand; but his firm grip on the flourishing business had recently relaxed, and people wondered anxiously what would happen if he did not recover from the blow that had struck him down. Fred Hulton, his only son, and assistant treasurer to the company, had been found in the factory one morning with a bullet-hole in his head, and it was believed that he had shot himself. His father gave his evidence at the inquiry with stern self-control, but took to his bed afterwards and had not left it yet. So far as the townsfolk knew, this was the first time he had shown any weakness of body or mind.

The train was late, but Foster enjoyed the pipe he lighted. It was ten years since he landed at Montreal, a raw lad without friends or money, and learned what hard work was in a lumber camp. Since then he had prospered, and the strenuous life he had led for the first few years had not left much mark on him. Now he thought he had earned a holiday, and all arrangements for his visit to England were made. Featherstone, his partner, was going with him. Their sawmill, which was run by water power, had closed for the winter, when building material was not wanted, and the development of a mineral claim they owned would be stopped by the frost. They had planned to put in a steam engine at the mill, but the Hulton company had delayed a contract that would have kept the saws running until the river thawed.

Foster, however, did not regret this. Except on Sundays, he had seldom had an hour's leisure for the last few years. Gardner's Crossing, which was raw and new, had few amusements to offer its inhabitants; he was young, and now he could relax his efforts, felt that he was getting stale with monotonous toil. But he was a little anxious about Featherstone, who had gone to see a doctor in Toronto.

A whistle rang through the roar of the rapid and a fan-shaped beam of light swung around a bend in the track. Then the locomotive bell began to toll, and Foster walked past the cars as they rolled into the station. He found Featherstone putting on a fur coat at a vestibule door, and gave him a keen glance as he came down the steps. He thought his comrade looked graver than usual.

"Well," he said, "how did you get on?"

"I'll tell you later. Let's get home but stop at Cameron's drug store as you pass."

Foster took his bag and put it in a small American car. He drove slowly across the bridge and up the main street of the town, because there was some traffic and light wagons stood in front of the stores. Then as he turned towards the sidewalk, ready to pull up, he saw a man stop and fix his eyes on the car. The fellow did not live at the Crossing, but visited it now and then, and Foster had met him once when he called at the sawmill.

"Drive on," said Featherstone, who touched his arm.

Although he was somewhat surprised, Foster did as he was told, and when they had passed a few blocks Featherstone resumed: "I can send down the prescription tomorrow. That was Daly on the sidewalk and I didn't want to meet him."

A minute later Foster stopped to avoid a horse that was kicking and plunging outside a livery stable while a crowd encouraged its driver with ironical shouts. Looking round, he thought he saw Daly following them, but a man ran to the horse's head and Foster seized the opportunity of getting past.

"What did the doctor tell you?" he asked.

"He was rather disappointing," Featherstone replied, and turned up the deep collar of his coat.

Foster, who saw that his comrade did not want to talk, imagined that he had got something of a shock. When they left the town, however, the jolting of the car made questions difficult and he was forced to mind his steering while the glare of the headlamps flickered across deep holes and ruts. Few of the dirt roads leading to the new Canadian cities are good, but the one they followed, though roughly graded, was worse than usual and broke down into a wagon trail when it ran into thick bush. For a time, the car lurched and labored like a ship at sea up and down hillocks and through soft patches, and Foster durst not lift his eyes until a cluster of lights twinkled among the trees. Then with a sigh of relief he ran into the yard of a silent sawmill and they were at home.

Supper was waiting, and although Foster opened a letter he found upon the table, neither of the men said anything of importance during the meal. When it was over, Featherstone sat down in a big chair by the stove, for the nights were getting cold. He was about thirty years of age, strongly built, and dressed in city clothes, but his face was rather pinched. For part of the summer, he and Foster had camped upon their mineral claim in the bush and worked hard to prove the vein. June, as often happens in Canada, was a wet month and though Featherstone was used to hardship, he sickened with influenza, perhaps in consequence of digging in heavy rain and sleeping in wet clothes. As he was nothing of a valetudinarian he made light of the attack, but did not get better as soon as he expected on his return and went to see the Toronto doctor, when Foster urged him.

The latter lighted his pipe and looked about the room. It was warm and well lighted, and the furniture, which was plain but good, had been bought, piece by piece, to replace ruder articles they had made at the mill. One or two handsome skins lay upon the uncovered floor and the walls were made of varnished cedar boards. A gun rack occupied a corner, and the books on a shelf indicated that their owners had some literary taste, though there were works on mining and forestry. Above the shelf, the huge head of a moose, shot on a prospecting journey to the North, hung between the smaller heads of bear and caribou.

(To Be Continued.)

The Kitchens Must Win

Mr. O. H. Van Norden, chairman of the Speaker's Bureau of the United States food administration, in a recent address declared that the outcome of the war must be decided in the kitchens of Canada and the United States during the coming year.

"It is up to America; it is up to Canada," he said, "to supply the great quantities of foodstuffs that our allies must receive this year, and if we do not, if we fail them, the war is going to end, and it is not going to end in the favor of the allies and in our own favor."

One's feelings about prices high
Depends, the truth to tell,
On whether one desires to buy
Or one has things to sell.

Germans Start Press Campaign

Fear Austria-Hungary Will Demand an Early Peace

The correspondent of the London Daily News at Rotterdam writes:

There are indications that a campaign is on foot, the aim of which is to make Austria more than ever the mere vassal of German militarists, with the immediate purpose of securing for the western front the help of her armies now largely set free by events in Russia.

The German government knows the Austro-Hungarian peoples are war-weary and that their desire for peace will be intensified by the armistice negotiations with Russia. The feeling must be changed by a great press campaign, which is now being organized. It must be proved to the Austrian people that war in the words of the Vossische Zeitung "must be carried to a successful conclusion by Germany and Austria together, not only with all their military, but also with all their political forces."

The price of success is struggle—but the struggle can be minimized and success made reasonably sure if you work that God-given faculty, your mind.

Note and Comment

Farmers may not realize that they are unpatriotic if they are not selling their worn-out machinery and implements.

Large quantities of iron and steel are needed for guns, shells, bridges, and other war purposes. There are many farms on which a good deal of junk is to be found. Higher prices are being paid for scrap metal than formerly, but, in order to save unnecessary expense in getting it to the foundries, neighboring farmers might co-operate and make one hauling do instead of several.

The total coal production of Canada in 1916 was 14,500,000 tons, while the imports were 17,500,000 tons. This shows our dependence on the United States and the necessity for retaining public control of water-powers.

"There's no use talking," said the dame
There's no use talking, was her claim.
There's no use talking, that is true.
There's no use talking, but they do.

The worst in sitting coal is not the time it takes nor the dust it makes, but the state of mind it puts us in toward men who cannot tell a slate quarry from a coal mine.

Throughout the country there was a splendid response during 1917 to the call for increased agricultural production. Larger crops were raised on the farms, and city dwellers by the cultivation of gardens and vacant lots contributed greatly to the success of Canada's efforts to relieve the world-wide food shortage. Greater production of food supplies than ever is required this year, for field crops are not only required to meet immediate human needs, but increased production of hogs, dairy products, and beef are dependent upon such crops.

Only about eight ratepayers of the Monitor school district considered it worth their while to attend the annual meeting. During the past, a great have aired their "grievances" on the school situation, to all and sundry, but fail to appear with them at the right place where any wrong can be rectified.

R. M. of Stewart No. 302

The first meeting of the Council of the R. M. of Stewart was held at Minor Schoolhouse on Jan. 7th.

The following Councillors took the Oath of Office: T. H. Noad, T. Partridge, B. R. Cramer, H. J. Shannon, R. C. Bowman and Henry Peterson. T. Partridge was elected Reeve and H. Peterson, Deputy Reeve (both by acclamation). Jas. H. Norton was appointed Sec-Treas. and Assessor at $800 per year and special tax collector at a commission of 5% on all taxes not on the 1918 Tax Enforcement Return.

Moved by T. Partridge that thir Council back the Sec-Treas to the limit in enforcing the taxes. Carried unanimous.

Moved by H. Peterson that we send the Reeve and Sec-Treas to the Annual Convention of Rural Municipalities. Crd unn.

Moved by B. R. Cramer that the delegates state the views of the Ratepayers who were present at the annual meeting as regards Municipal Hail Ins. Crd.

Moved by T. Partridge that this Council repeal the by-law relating to Gopher Poison. Carid. Noad, Petersen and Shannon, for motion. Bowman and Cramer, against.

Moved by T. Partridge that any person residing near a bridge or culvert, in the R. M. of Stewart, No. 302, and same being out of repair, will be paid for repairing same. Carried.

It was decided to borrow $15,000.00 to pay Hail Ins. Board, on the security of uncollected Hail Taxes, and $8,000.00 for the schools, on uncollected school taxes.

Moved by T. H. Noad that the next meeting be held at Minor School on Saturday the 16th of February, 1918

J. H. Norton, Sec-Treas.

To Ratepayers owing arrears of Taxes

The Tax Enforcement Return of this Municipality is now being made up, and same will be brought up before the sittings of the Court in April.

These proceedings are costly, and the land will be forfeited unless these taxes are paid.

J. H. Norton
Sec-Treas.

U. S. Firms Control Canadian Fisheries

Dominate Lake Fisheries Because Chief Market Has Been in U.S.

The greater portion of the Canadian lake fishing business is controlled by United States firms, and this is due to the fact that more than 90 per cent. of the total output finds its market in the United States.

On our Great Lakes, a very large fishing industry is carried on, not only during the summer and autumn months but also in mid-winter, when the fish are taken through the ice, and, owing to climatic conditions, can be transported long distances, without requiring expensive methods of refrigeration. They are frozen naturally as soon as taken from the water and are shipped to various centres in the United States especially in the Western states, although there is a growing demand for Canadian lake fish in Eastern markets also.—From 'Fish, Birds and Game,' published by the Commission of Conservation.

Dread of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are warded off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

New Servant-girl Story

The wife of a successful young literary man had hired a buxom Dutch girl to do the housework. Several weeks passed and from seeing her master constantly about the house, the girl received an erroneous impression.

"Ogeuse me, Mrs. Blank," she said to her mistress on day, "but I like to say somedings."

"Well, Rena?"

The girl blushed, fumbled with her apron and then replied, "Vell, you pay me four tollars a week——"

"Yes, and I really can't pay you any more."

"It's not dot," esponded the girl; "but I be willing to take three tollars till—till your husband gets vork."—Boston Transcript.

Minard's Liniment Cures Diphtheria.

Mrs. Greener (at her first game of football)—Oh, isn't it awful? Horrible! Why, they will kill that poor fellow underneath!"

Her Daughter (an enthusiast)—"Don't be silly, mother. He doesn't mind it. He's unconscious by this time."—Boston Transcript.

First Germany Must Be Beaten

In Order to Obtain the Sort of Peace That Would Be Worth While

What will be the effect of Lord Lansdowne's letter in Germany? Simply to give the military party, which is in complete control an opportunity to claim that Britain is worn out with the war and ready to quit. And any quitting now would be a German victory. Every utterance of importance from Germany shows that the party that brought on the war as a war of conquest is determined to end it on that basis only.

The defeat of Germany is the first requisite to obtaining the sort of peace that would be worth the terrible sacrifices that have been exacted from the nations by the wicked men who determined on a world dominion to be won by violence.

There is not the slightest reason to suppose that this is not the feeling in England. Lansdowne no more speaks for Britain than La-Follette or Gore speak for the United States. Every nation has its faint hearts. They are not the men who control.—Kansas City Star.

The Allied War Conference

The Results of the Conference Have Been Highly Satisfactory

There has naturally been no talk of peace aims at the inter-allied conference at Paris. The sessions have been entirely concerned with the winning of the war. The terms of peace come afterwards.

The results of the conference have been highly satisfactory. Not only has the allied war council been established for land operations, but a supreme inter-allied naval committee of consultation also has been agreed upon. Naturally in this connection Great Britain's voice will be decisive seeing that her navy is the basis of the entire entente alliance.

The entente powers are now ready to prosecute the war with a singleness of purpose such as they have not previously known. They can control the British, French and Italian fronts as one weak theatre and move troops and supplies accordingly. The resultant strengthening of their offensive and defensive power will be considerable. And opportune also. For the central powers, judging from their savage blows against the Italians and on the Cambrai front, are fighting more fiercely than they ever did in hope to secure a decision before the spring.

With the million men or so they will secure through Russia's defection, they hope to bring the allies to the peace-table in a few months. They already realize that the submarine piracy will never do it.—Vancouver World.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, the best remedy of the kind that can be had.

This Means You!

"Eat less wheat, meat, sugar and fats, to save for the army and our allies," says the food controller. "Eat more corn, oats and rye products, fish and poultry, fruits, vegetables and potatoes, baked, boiled and broiled foods."

This means you! To ask the Canadian people to eat less of certain foods in order that the soldiers at the front may not go short is a matter of intense seriousness.

Minard's Liniment Cures Garget in Cows.

Music During Air Raids

The Spirit in Britain That Will Not Down

To the folk of London town air raids have ceased to be a novelty. Londoners are meetings the trying circumstances with fortitude. During the raids music is frequently called into commmission to enable the people to keep cool, be cheery and stand the strain.

One evening it is related that when the raid was on, a street organ in a sheltered corner of a busy thoroughfare ground out Leslie Stuart's "Soldiers of the King" with an air of defiance that is typical of the British spirit. In the days of the South African war that same number which was then "Soldiers of the Queen," nerved many a heart.

A little later the same evening there was heard in a home some voices accompanied by a piano singing the old hymn "Hold the Fort." These represent the spirit that will not down.

The whole subject of the exportation of milk from Canada to the United States has been taken up with the United States food administration

The German Colonies

Must Be Free for All Time From German Oppression

Fortunately the Germans cannot get their colonies back until they have defeated the British navy. The world has plain warning of what will happen if it places these enemies of humanity in a position to renew their plot against mankind. The German colonies would become places of arms and bases for the pirate submarines. In all the German plans there is no thought for the native. He is to be treated as a beast. As a beast he has been treated in the past. In the German Southwest Africa forced labor was imposed on every native from the age of seven; all natives could be flogged by any member of the German police; and no native could own a horses or cattle. The allies, who believe in human freedom and in the Christian doctrine of the worth to the individual, cannot restore it at any price.—London Daily Mail.

STUDY AND EXERCISE

Overstudy and lack of exercise make thin bloodless children. Study does not usually hurt a child at school unless the studies encroach on time that should be spent in out-of-doors exercise. But lack of exercise and overstudy is a combination that brings on St. Vitus dance. If your boy or girl at school is thin and pale, listless and inattentive, has a fickle appetite, is unable to stand still, you must remember that health is much more important than education, and more time should be given to exercise and recreation.

See to it at once that the child does not overstudy, gets plenty of out-of-door exercise, sleeps ten out of every twenty-four hours, and takes a safe, reliable tonic like Dr. Williams' Pink Pills until the color returns to the cheeks and lips and the appetite becomes normal. For growing children who become pale and thin Dr. Williams' Pink Pills are not only safe but in most cases are the very best tonic that can be taken. These pills build up the blood, strengthen the nerves and assist nature in keeping pace with rapid growth.

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail postpaid at 50 cents a box, or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Over-fulfilled

Ragged Rogers—Strange how few of our youthful dreams come true, ain't it?

Frayed Phil—Oh, I dunno. I remember how I once yearned to wear long pants. Now I guess I wear 'em longer than any men in the country.

A Pill That Is Prized.—There have been many pills put upon the market and pressed upon the public attention, but none has endured so long or met with so much favor as Parmelee's Vegetable Pills. Widespread use of them has attested their great value, and they need no further advertisement than this. Having firmly established themselves in public esteem, they now rank without a peer in the list of standard vegetable preparations.

Well Irrigated

George was hampered by a mother whose idea of godliness was cleanliness. Notwithstanding the frequent baths to which he was condemned George thrived exceedingly. One day a neighbor remarked on his rapid growth.

"Yes," said George, "that's ma's fault; she waters me too much!"—Tit-Bits.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Cure.

She Economized

"Tom, dear," said Mrs. Youngbride as they sat down to dinner, "I did just as you told me to."

"You mean about economizing?"

"Yes. Instead of buying airloin steak I bought a porterhouse. It isn't neatly so large, you know."

"Is this son of yours adolescent?" "Oh, no, sir, he's just a little queer in the head."—Baltimore American.

Torpedoboats Dash and Swirl in Apparently Aimless Circles Chasing Prey

"It was a clear day off Folkestone. In the channel two English torpedo boats loafed. There was a sudden stir of excitement. The torpedo boats put on full steam and began dashing about in apparently aimless circles. A seaplane whirled out of the bay and spun aloft, circling a spot in the water. Watching crowds saw a dark shadow which sank back into the depths. Motor lorries hurried several detachments of soldiers to the shore as the hovering guards of the coast drove their prey toward land. The soldiers kept a curious populace back until dark. Next morning all was calm as usual, but another German submarine had been added to the list captured by England's sea hunters.

"It happened just outside our window," Mrs. Bates said. "We wanted to see what became of the German crew. But we were disappointed Whatever happened was obscured by darkness."

Mr. and Mrs. Bates were in England at the beginning of the war. They sailed for the United States in September.

"It may sound strange," Mrs. Bates said, "but about the best thing we found when we got home was white bread. After a diet of English war bread—a grayish sticky substance composed of a little wheat and a lot of something else—American bread seemed the best food we had ever tasted."

On the return voyage Mrs. Bates' vessel was attacked twice by submarines. The first attack was late on a clear morning. A lookout sighted a periscope and the wake of a torpedo speeding toward the ship. The vessel veered and the torpedo passed 50 feet astern. Then the naval gun crew unlimbered their cannon and the U-boat disappeared.

The next attack resulted disastrously for another of the kaiser's sea terrors. The U-boat fired two torpedoes, which missed. Naval gunners sent a hail of shot toward the periscope. Mrs. Bates counted 68 shots. The captain of the gun crew wouldn't tell what happened, but ship gossip had it that the gun crew's first shot disabled the "sub," and that later it went down.

In London Mrs. Bates saw the first Zeppelin downed by an English airplane. She and her husband were awakened by the roar of bursting bombs. They hurried into the street. Hundreds of fingers of light darted through the sky and finally the Zeppelin was flooded with light. Two English airplanes darted in, there was a rattle of machine gun fire and the Zeppelin fell in flames.

For the women of England Mrs. Bates has the strongest praise. Women are doing everything, she says—and working cheerfully. Wives of noblemen are serving in hospitals under their former servants, scrubbing, carrying coal—because English hospitals generally have steam heat— making bandages and stooping gladly to the hardest kind of manual labor.

Cafes and theatres, now are attended chiefly by refugees, Mrs. Bates says.

"The English, without exception, have given their entire time to the war," Mrs. Bates said. "If anyone suggests a table for bridge she is looked on as an enemy of the country."

Extravagance Is Under Suspicion

A Canadian correspondent, writing from England, makes the following observation, which is not without its significance for those who imagine that they "must keep up appearances" in connection with the consumption of food:

"To be too well dressed and too fashionable nowadays induces the suspicions to regard the luxurious one as a profiteer or the near relative of one of these outcasts."

Minard's Liniment Co., Limited.

Sirs,—I have used your MINARD'S LINIMENT for the past 25 years and whilst I have occasionally used other liniments I can safely say that I have never used any equal to yours.

If rubbed between the hands and inhaled frequently, it will never fail to cure cold in the head in 24 hours. It is also the Best for bruises, sprains, etc.

Yours Truly,

J. G. LESLIE.

Dartmouth.

Preparing for a Harvest

As the oats in her hat nodded and trembled they persistently tickled the ear of the man seated next to her. He stood it in silence for some time, then he ostentatiously took a huge pocket knife out of his pocket and began to sharpen it on the sole of his boot.

"Whatever are you g-going to d-do?," cried the girl.

"Oh, don't worry, Miss!" said the man, testing the edge of the blade on his thumb. "But the next time as them oats gets in my ear there's going to be a harvest."—Pittsburgh Dispatch.

"Are you a tramp?"

"No, mum, I'm a food conserver. Have you got any old food you don't want wasted?"—Louisville Courier-Journal.

Exposure Aches

Cold rain, winds, and dampness bring out the rheumatic aches. An application of Sloan's Liniment will soon have the blood circulating and the pain will disappear. For neuralgia, lame back, stiff neck, sprains, strains, and all muscle soreness, Sloan's Liniment can't be beat. No rubbing; it quickly penetrates and does its work without stain or clogging of the pores. Better than plasters or ointments. For cold feet or hands try an application of Sloan's Liniment. Generous sized bottles, at all druggists, 25c., 50c., $1.00.

No Bran or Shorts Alowed Exported

Farmers' Feed Supply Will Be Provided For

In order to assist in the campaign for greater production of food animals, the food controller announced that not a ton of bran and shorts will be allowed to be exported until the Canadian requirements are fully met. The food controller is also considering the question of fixing prices for such feed, but in any case it will be made available to the farmers at the lowest possible cost, and the profits of the dealers may be fixed as soon as information from the several provinces is secured in response to inquiries which have been sent out.

The government refused to allow the exportation by a large milling company of 143 cars of bran and shorts, but purchased them and resold them to farmers without any charge for the government's service.

Applications for feed should be addressed to the food branch of the department of agriculture, Ottawa. Mr. Hanna stated that, if necessary to insure the farmers obtaining feed supplies, the government will take total output of mill by-products and distribute it. He added that action would be taken at once in case of complaints that the mills were requiring the purchase of flour with the offals. This practice must be discontinued.

A separate feed branch of the Dominion department of agriculture is being established in Winnipeg to serve Western Canada.

There is no more effective vermifuge on the market than Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

Shorter Day's Work After the War

English Labor, After Taste of Better Conditions, Will Not Recede

Lord Leverhulme, head of a great English soap industry, the capital of which is 200 million dollars, has very pronounced views as to the effect of the great war on the future position of the nation's workers. Lord Leverhulme is himself a model employer, having provided for his work people a model town in which they live under delightful social conditions, and having provided also facilities by which they may secure direct financial interest in the concern in which they are wage earners.

"It may, I think, be taken for granted," he says, "that when peace is restored workers will not be willing to return to pre-war conditions of wage and living. I am convinced they will never consent to go back to them.

"The war has altered many things; it has broadened out horizon; it has given us new points of view; it has clarified our thought; it has introduced radical changes into our social, industrial and commercial systems.

"Most of them have for the first time tasted and enjoyed the sweets of life, the full fruits of labor; they have grown accustomed to a higher plane; its pleasures and advantages; they will strive to remain on that level and, if possible, rise above it, and with this aspiration I am in full sympathy and accord. And if, after the war, any attempt should be made to thrust labor back into the depths from which it has ascended it would be, in my opinion, not only a disastrous economic blunder, but a policy akin to crime against civilization and humanity."

Minard's Liniment Cures Colds, etc.

The food controller is being given authority to license dealers in food supplies, and a general plan of licensing is being prepared. Before it is applied to any particular trade, representatives of that trade will be consulted.

A Debt to the Navy

But for the British Navy War Would Have Been Over in Six Months

Whatever mobility, whatever power of recuperation and endurance the allies possess they owe first and foremost to the sea. But for the British navy, as we can all see now, the war would have been over in six months and Germany would have won. Defeat the British navy and all the hopes of the allies and all their achievements would even now crumble to nothingness. No disaster on land is altogether irreparable so long as we hold the seas. No triumph on land that we or any of our allies could win would be permanent if at the same time we ceased to be supreme on the oceans.

What the navy has accomplished in safe-guarding the transport of 13,000,000 men and hundreds of millions of tons of materials; in making it possible for the allies to draw on the entire world of neutrals for all they have needed; in sweeping German commerce from the seas and pressing with relentless finger upon the main artery of German life; and in furnishing the protection under which our merchantmen have brought us and our allies not only the material of war but the means of life—all this is a tale the wonder and heroism of which, when it is fully told, will remain forever a precious part of the British heritage.—London Daily Mail.

Food in Jerusalem

In Jerusalem, bread costs 11 times as much as it did prior to the war. Petroleum costs 30 times as much as in 1914, and milk five times.

An Unhappy Inference

Didn't Care for Theological Works of Any Description

A student assistant, engaged in reading the shelves at the public library, was accosted by a primly dressed middle-aged woman who said that she had finished reading the last of Laura Jean Libby's writings, and that she should like something just as good.

The young assistant, unable for the moment to think of Laura Jean Libby's equal, hastily scanned the shelf on which she was working and, choosing a book, offered it to the applicant, saying: "Perhaps you would like this, 'A Kentucky Cardinal.'"

"No," was the reply, "I don't care for theological works."

"But," explained the kindly assistant, with needless enthusiasm, "this cardinal was a bird!"

"That would not recommend him to me," said the woman, as she moved away in search of a librarian who should be a better judge of character as well as of Laura Jean Libby's peers.

Rye Flour Mills

Winnipeg is to have a rye flour mill, which will furnish another available substitute for wheat flour. The mill will have a capacity of 100 barrels per day, grinding both spring and winter rye. This flour will be put up in 98, 49 and 24-pound bags, and will sell wholesale at the same price as second patents flour, or $5.35 per 98-pound sacks in less than ton lots delivered in Winnipeg. A mixed flour, partly rye and partly wheat, will also be manufactured.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Catarrh being greatly influenced by constitutional conditions requires constitutional treatment. Hall's Catarrh Cure is taken internally and acts through the Blood on the Mucous Surfaces of the System, thereby destroying the foundation of the disease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative powers of Hall's Catarrh Cure that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Canada's Share

A subscription of $300,000,000 this time will bring the Dominion's war loans up to $650,000,000 The proportional total for the United States would be $8,125,000,000 so we shall have to subscribe a third Liberty loan to overtake and pass her. However, Canada has lent the mother country some $600,000,000, which is relatively to her poplation about equal to the $7,500,000,000 we shall lend all allies in the first year of war. It must be considered also that the Dominion has been fighting for three years and has contributed a great proportion of her men—and there are no better fighters on any of the battlefronts.—New York Sun.

Minard's Liniment Cures Distemper.

"How does your boy like life in the army?"

"Not particularly well. He says he's been in it six weeks now and hasn't once been ordered to do something glorious."—Detroit Free Press.

Settlers' Permits on Prairies

The permit system of regulating settlers' clearing fires has been instituted on Dominion lands in Manitoba and Saskatchewan. The administration, by special arragement, is carried out by provincial officials.

A Prime Dressing for Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh. There is no other Oil that has its curative qualities.

The Maddening Crowd

Newcomer (at resort)—"Is this a restful place?"

Native—"Well, it used to be until folks began to come here for a rest."

Let's not be over anxious to grasp an opportunity that is too hot.

What Will It Do For Me?

YOU have heard of the great good this food cure is accomplishing for others. You have come to realize that nervous diseases do not right themselves, and therefore feel the necessity of some treatment to help you back to health and strength.

Now comes the all-important question as to what Dr. Chase's Nerve Food will do for you.

Basing our answer on a knowledge of the restorative value of the ingredients contained in this food cure, and on the experience of those who have proven its curative powers under the most trying conditions, we want to tell you that—

It will make your blood rich and red.

It will nourish the starved nerve cells back to health and vigor.

Mrs. C. French, 164 Lansdowne street, Peterboro', Ont., writes: "I was troubled with nervousness, sleeplessness, frequent headaches and indigestion. For many years I was troubled with a twitching or fidgety feeling about my limbs after retiring, causing me much loss of sleep. If wakened out of my first sleep, even had I been asleep only five minutes, I would lie awake for hours and could not get to sleep again. Any sudden noise or a door slamming would set my nerves going, and I would fear that something dreadful was going to happen. I had tried different remedies for this trouble, but without success. A friend asked me one day why I didn't try Dr. Chase's Nerve Food, so I thought I could at least give it a trial. I secured some and commenced using them, and found they benefited me so much that I have taken fully a dozen boxes. My nervousness or fidgety feeling in the limbs is entirely cured. I can now eat and sleep well. I can recommend Dr. Chase's Nerve Food strongly, and would advise anyone suffering from nervous trouble of any kind to use them according to directions."

It will cure nervous headaches by removing the cause.

It will strengthen the action of the heart.

It will correct the weakness and inactivity of the digestive organs.

It will restore energy, ambition and confidence.

It will prevent the development of nervous prostration, paralysis and locomotor ataxia.

Why not put Dr. Chase's Nerve Food to the test? We know that the formula is right: We have proven to you by thousands of reports from cured ones that this treatment positively effects cure, even in the most complicated cases.

We cannot do more. It remains for you to make the test. You have everything to gain by using this building-up treatment, for it cannot fail to be of at least some benefit to you.

Dr. Chase's Nerve Food

50 cents a box, a full treatment of 6 boxes for $2.75, at all dealers, or Edmanson, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations only disappoint.

CLOSING OUT SALE

The Local Supply Co. has decided to dispose of their entire stock At Strictly Laid Down Cost Price

NOTICE THIS !

These prices are far below the market value today, because this stock was purchased before the high war prices had advanced very far.

AUCTION SALE

Every Saturday, until entire stock is sold, you can obtain everything at strictly your own prices, by auction.

PACIFIST TALK IS ENDANGERING GREATLY THE CAUSE OF THE ALLIES

THE FATE OF DEMOCRACY IS IN THE BALANCE

Winston Spencer Churchill, British Minister of Munitions, Says There has Never Been a Moment During the War when There was Less Excuse for being Misled on Issues

Speaking at Bedford recently on the subject of the allies' war aims, Winston Spencer Churchill, minister of munitions, said that the situation was more serious than it had been reasonable three months ago to expect. The country and the allied cause, Colonel Churchill added, were endangered. The future of the British empire and of democratic civilization was hanging in the balance and would continue to hang there for a considerable period.

There are people who wish to bring about a premature peace. They are listening to the sophistries and dangerous counsel of certain politicians. People who say 'Re-state your war aims,' really mean to make peace with the victorious Huns.

"The British do not mean to put up anything but the legitimate and righteous aims with which we entered the war, and if such an issue as this were seriously raised, it could be decided only by the whole nation. I cannot see that there is the slightest danger in submitting that question to he free decision of he whole nation.

"President Wilson's statement of war aims is good enough for me. We mean to win the war, however long it may take. If Russia has fallen out of the ranks, the United States has fallen in and is coming to our aid. The longer Great Britain and America are fighting side by side, the closer they will be drawn together. That is a tremendous fact, and it will make amends for what we are now suffering."

After frankly dealing with the present unfavorable war situation, he said this was entirely due to the fact that Russia had been thoroughly beaten by German intrigue and gold, no less than German steel. This had robbed the allies of their prize when almost within their grasp.

"We shall not be beaten by perils and sufferings, we have not deserved," he declared, amid loud cheers. "Our aims are exactly what they were in August, 1914, when Belgium was invaded. We have not increased our aims and we shall not diminish them one jot. There has never been a moment during the war when patriotic men had less excuse than the present for being misled by sophistries and dangerous counsels.

"Our sole aim is that the prepetrators of these innumerable crimes shall not profit thereby and emerge stronger than before. That is Asquith's and Lord George's and Wilson's war aim, and I cannot conceive of any situation arising, whereby the war will be prolonged one unnecessary day solely through the question of territorial gain.

"We are not fighting for booty or revenge. The British empire will be satisfied when Prussian militarism is unmistakably beaten and the German people saved from militarism and its evil spell."

Buckwheat Bread and Cake

Have Been Found Appetizing Substitutes for Wheat

Buckwheat bread and "buckcake" have been found appetizing substitutes for wheat flour, in tests made in the baking laboratory of the Ohio Experiment Station. Buckwheat bread resembles German or whole wheat bread in color and flavor.

For this bread a cake of yeast and two tablespoonfuls of sugar or molasses are added to a cup of milk and a cup of water; then a tablespoonful of lard or butter is put in, and finally 2 1-2 cups of buckwheat flour and a cup of wheat flour are sifted in with three teaspoonsful of salt. When the mixture is like a stiff batter, it is ready to be put in greased pans and after rising two hours baked for 40 minutes or more.

For buckcake, three-quarters of a cup of buckwheat flour is added to as much wheat flour, three teaspoonsful of sugar or molasses and a teaspoonful of salt; then add three-quarters of a cup of milk, a well-beaten egg and a tablespoonful of melted butter, and bake for 25 minutes in hot oven.

Shortage Now and After the War

Mr. E. F. Smith of the United States department of agriculture, speaking before the National Academy of Science at the University of Pennsylvania said that following the present war there would be a shortage of wheat for many years. Every gun fired in Europe, he said, burned up a definite quantity of the comparatively rare fixed nitrogen required as the basic fertilizer for grain.

Teacher—Now, Robert, can you tell me how a bat hangs with his head downward?

Bobby—Please miss, do you mean a chimney bat or an acrobat?—Boston Transcript.

Kilts Strike Terror

German Attack Frustrated by Presence of Mind of the Colonel

The very sight of the kilt strikes terror into the hearts of the average German soldier. A man who went overseas with a Western highland battalion writes of a German attack which was frustrated by the wit of his colonel and the fear of the kilt. "One day," he says, "the Fritzes had just massed, and were beginning to top their parapet for a charge, when, to our utter amazement and consternation, the colonel sprang up the ladder, and in a trice was out on our own parapet for all the Germans to see.

"Before we could realize what had happened, he raised his arms, shouting at the pitch of his voice: "Come on, Gordons, Camerons and Seaforths, come on!"

"For a moment we didn't understand, and then we let out such a yell, and let drive such a terrible volley that the Fritzes, to a man, turned tail, and before you could have said "Jack Robinson" every mother's son of them was back again in the trenches—the charge was 'off'—and the colonel stepped down, smiling.

"It was the colonel's wit and had saved the situation. Those Germans must have thought that all the clans of Scotland were at his back. As a matter of fact, had they come over they would have found only a handful of men to deal with."

Allies Need Much Wheat

Greatest Deficiency in Production Has Occurred in France

Mr. T. K. Doherty, commissioner for Canada of the international institute, estimates that the wheat production of the world for 1917 is about 193,000,000 bushels less than last year and about 414,000,000 bushels, or over 10 per cent. less than the pre-war average.

The European and Mediterranean countries, both neutral and allied, which depend largely on the outside world for their supplies are Denmark, France, Greece, Italy, Holland, Norway, Portugal, Cyprus and Malta, Spain, Sweden, Great Britain, Ireland, Egypt, Tunis, Switzerland and Belgium. These countries produced 570,087,000 bushels of wheat in 1917 as against 706,073,000 bushels in 1916 and an average of 782,791,000 bushels in the five pre-war years, a decrease of 135,186,000 bushels or 19.2 per cent. from 1916 and of 211,904,000, or 27 per cent. from the pre-war average. The greatest deficiency exists in France, where the 1917 crop is 172,669,000 bushels less than the average production of 317,639,000 bushels for five years before the war.

France's Food Situation

Will Require Help From This Continent to Make up Shortage

In a recent statement issued by Mr. Maurice Long minister for general revictualling of France, it was shown that the 1917 wheat crop of France was only 39,900,000 hundredweights, as compared with 87,830,000 in 1913, 76,930,000 in 1914, 60,630,000 in 1915 and 58,410,000 in 1916. The entire production in France this year of cereals, potatoes and beet root was only 222,000,000 hundredweights as against a production in 1913 of 358,000,000. From this it is evident that with the most rigorous rationing, France will require to import during the coming year not less than 40,000,000 hundredweights of cereals. It lies chiefly with the North American continent to make up this shortage.

The Bulldog Has His Teeth In

We must be prepared for a long war, and we must make up our minds to all the economies and all the possible privations which that prospect demands from our whole population. That is how we shall win. The British bulldog has his teeth in his enemy's throat, and severe though the punishment has been which he has taken, he will never let go. That is how the great race to which we belong" achieved its greatness, preserved its liberties, and secured for smaller and weaker peoples their "place in the sun." That is how, with the steady and loyal help of its allies, it will vindicate the same righteous ends and win this war.—London Times.

West Needs More Reserves

Further extensions of the areas set apart in Western Canada as forest reserves are much to be desired. No such reserves have been made since 1913, though very considerable areas have been found upon examination to be chiefly valuable for forest purposes.

India's Part in the War

Contributions of Men and Wealth in the Defence of British Empire

The visit to the great Eastern Dependency of Mr. Montagu, the secretary of state for India, has revived interest in the political unrest which has developed in that country as one of the by-products of the European war. What India has done in this war must form an important factor when the question of political reform comes up for review.

Despite the subtle machinations of Germany, India as a whole has proved her loyalty in this conflict. It was one of the hopes of Berlin that Britain would be hampered in the great struggle by an insurrection in India. After three years of war, India has stood the test. Not only has she been free from serious uprisings, but she has done magnificent service to the empire. At the beginning of the war the army in India was comprised of 78,000 British and 158,000 native troops. From this comparatively small army India has succeeded in building up successive expeditionary forces that are doing splendid service in various fields of war. The entry of Turkey into the war was a serious strain upon the loyalty of the Mohammedan race, but the sixty millions of that faith remained firm in their allegiance to the British emperor. Among the tasks entrusted to native Indian troops were the defence of their own country, and the advance in Gallipoli when the Gurkhas fought their way side by side with British troops to within sight of the Hellespont. In France, in the early stages of the campaign, Indian troops took part in the series of battles that culminated in the three days' fight at Neuve Chapelle. Later these forces were transferred to Mesopotamia, where they have won distinction and honor in the very heavy fighting which has taken place in that region.

As a granary of the Empire and a source of supplies for the British armies, India has played a notable part. Since the outbreak of war she has sent Britain wheat to the value of fifty-five million dollars. In addition she supplied Britain, in the first critical weeks of the war, with ninety million rounds of small arms ammunition, a large number of rifles, and 330 modern field guns. In raw materials alone Britain has drawn from India hides to supply twelve million pairs of boots. India bears the expenditure of maintaining her own troops abroad, which is estimated at a total to date of seventy-five million dollars. In addition she has made a free grant of five hundred million dollars towards the cost of the war. The ruling chiefs have added to this by munificent personal contributions that attest their loyalty and devotion to Britain.

In view of what India has accomplished, her claim to fuller powers of self-government should not lightly be dismissed.—Toronto Globe.

The First Requisite

Military Defeat Necessary to Secure a Durable Peace

If Germany cannot be compelled to submit to law and civilization now, what possible chance is there of compelling Germany to submit after a truce has been made? If the nations that recognize the supremacy of law and treaty obligations cannot employ their police power successfully in this conflict, will they ever be able to employ it successfully? The first requisite to an international agreement that can command respect is the military defeat of Germany, and without that an agreement is not worth the paper upon which it is written. We shall be where we were previous to 1914, with German autocracy ready to strike again for world dominion the moment the prize seems to be within reach.

A durable peace will never be won by men who are ready to bargain for a temporary peace, and if a durable peace cannot be obtained, Germany has won the war, no matter what concessions Prussianism may make at the council table.—New York World.

The New Confederation

The great confederation of Atlantic nations commanding the naval power of Great Britain, the British and French military power, and the developing strength of the United States is able to hold and defeat the power of central Europe. If it comes to this test before there is a decision, the decision must be in favor of the Atlantic confederation into which the United States is to pour its whole strength. We are not eliminating any ally or discounting the power of resistance of any one. Whatever they add to the allied effort and what ver they subtract from the Germanic power is an addition to the strength against Germany.—Chicago Tribune.

Every man starts this life on an equal basis. One baby is as much a force as another—the individual is naught—time is the factor. We are all given the same amount of time each day—you have twenty-four hours and so have I.

Your farmer's granary is filled with grain—your own fine granary is stored with filtered thoughts. In both cases it is necessary to garner the crop before the store-house can be filled.

BRITISH WAR AIRPLANE'S FLIGHT TO CONSTANTINOPLE FROM LONDON

A REMARKABLE FLIGHT MADE ACROSS EUROPE

Details of the Thrilling Adventures of a British Airplane That Flew from London to Constantinople and Successfully Bombed Turkish Warships and War Office and Returned Safely

The story of a British battle airplane's flight to Constantinople from London and its sequel in the bombing of German headquarters and the Turkish war office there, was told recently by Handley Page and Basil Johnson, whose firm, Rolls Royce, Ltd., built the engines that flew the 2,000 miles without a hitch. Loading up at Hendon, the machine proceeded to Paris and Lyons, and to avoid the Alps continued by way of Marseilles. From Marseilles the journey was by way of Spezia to Pisa, Rome, and Naples, which was the last point over friendly country.

The next and perhaps most difficult stage of the journey was over the Albanian Alps to Saloniki, a trip of 250 miles across mountains varying from 7,000 to 10,000 feet in height, with no suitable place for a landing in case of need. Squadron Commander Savoy, who was chief pilot, told him, Handley Page said, that they could well see Bulgarian horsemen below who were running about in every direction waiting for a chance to kill them if they came down.

From Saloniki the adventurous party flew to their base, ovr hauled the machine and prepared for a long-distance bombing expedition to Constantinople, a distance of about 320 miles. On their attacking trip they set forth with sixteen bombs each weighing 112 pounds and on arriving at the Sea of Marmora they throttled down from 2,000 to 1,600 feet, the Golden Horn and other points being clearly in view After a short survey of the lights of Constantinople, and in order to make sure of their objectives, they came down to 800 feet and dropped a salvo of four bombs, hoping to reach the German battle cruiser Goeben, which was anchored just beneath them. Unfortunately they missed the ship, but then managed to hit one or two submarines that were lying alongside her.

Turning on their course, the British airmen made another attack on the Goeben and this time, in spite of the attentions of a number of Turkish and German anti-aircraft guns, managed to plant four bombs on the battle cruiser. Then they flew up to a ship called The General, which was the headquarters of the German staff and dropped two bombs on her, to the great consternation of naval and military officers assembled in her saloons. One more target too tempting to be missed attracted the intrepid aviators, and they next made their way to that part of the city where the Turkish war office is situated, and dropped two bombs on the building.

After half an hour's bombing of Constantinople the airmen turned round and started back to their base. Flight- Commander McLellan relieving his chief in steering. They had not escaped without damage, but even after one engine had been put out of action, they were able to get away without serious damage from guns below.

Handley Page said that Engineer Lieut. Rawlings, who was one of the party, reported they had no trouble at all with their engines, although water in the radiators boiled on one very hot day.

For a Permanent Peace

To Prevent the Risk of a War in the Future

We fight for a permanent peace, for a "Never again" settlement, which shall exclude the risk of conflicts being renewed after a few years' truce; but what we perhaps do not realize is that a war ten or twenty or thirty years hence would not merely repeat the horrors of the past struggle, bbt incalculably increase them. One has only to reflect on the development of the air arm, or on the possibilities of chemical warfare; to see that these terrible novelties, which are still in the infancy of invention, must, if twenty or thirty years of intense civilized ingenuity are concentrated on their development, entail horrors upon whole populations, military and civil, beside which the experience of the last three years would pale into insignificance.—London Daily Chronicle.

Pins His Faith in U-Boats

Up to Present Great Britain Has Won Rather Than Lost, Says Von Tirpitz

The German papers contain lengthy accounts of the speech of Grand Admiral von Tirpitz before the Hamburg branch of the Fatherland party, in which the admiral said:

"Up to the present in this war Great Britain has won, rather than lost. Peace based on the status quo ante or on renunciation, therefore, is out of the question for Germany."

With reference to the rumor that Germany would give up Zeebrugge and Ostend if the British evacuated Calais, von Tirpitz said:

"The evacuation of Calais would never be equivalent to the loss of such first-class security. Moreover, the channel tunnel will become a fact after the war. For real security we should have besides Flanders and Antwerp, Calais and Boulogne. The rumor in question is a screen behind which the question of Flanders might be permitted to disappear.

"The pretext that we cannot coerce Great Britain and America falls to the ground when we consider the growing scarcity of the cargo space of our ruthless arch-enemy. The time for final decision will come when real distress begins to take the place of merely threatening distress. That time will come. It is only a question of keeping cool."

Means Greater Sacrifice

Hoover Says Food Situation Grows Graver in Europe

A warning was sounded by Herbert C. Hoover, food administrator, that the American people were to be called upon to sacrifice far more in order to feed the allies and friendly neturals than was at first thought necessary. "Starvation on an unparalleled scale must ensue abroad unless there was a hearty response," Mr. Hoover said.

"The food situation in Europe," he said, "is far graver than when the preliminary survey of the food supply of the world was made for this year. We have an abundance for ourselves, and it is the policy of the food administration by the prevention of exports to retain for our people an ample supply of every essential foodstuff. The harvests of our allies have proved less than we had contemplated and the great curtailment of shipping by the submarines during the last few months has further prevented them from access to remote markets.

"Beyond the demands of the allies there is a call upon us by the friendly neutrals for food, and if we cannot at least in part respond to these neutral calls, starvation on an unparalleled scale must ensue."

Conservation Notes

The largest reserve of coal in Canada is situated in Alberta, Saskatchewan and British Columbia.

At least 70 per cent. of all fires in Canada is believed to originate from some form of carelessness and neglect.

The gradual exhaustion of the anthracite coal resources of the United States means a higher price each year for this class of coal.

It is hardly possible to realize the lack of knowledge of proper gardening methods which exists among the farming population of certain portions of the country.

Burlap curtains make good protection for windows and doors of stables and other animal houses. They allow admission of air but do not allow drafts. A burlap grain bag ripped open and tacked over the opening of the sow or hog house will keep out cold winds and rain.

Licenses to Sell Cereals

New Regulation Issued in Statement by Hon. W. J. Hanna, Food Controller

The food controller has issued regulations governing the trade in cereals in packages of less than 20 pounds weight. They provide that on and after January 1, no manufacturer of breakfast foods or cereals, shall manufacture for sale in Canada or sell in Canada such breakfast foods or cereals in original packages of less than 20 pounds without first obtaining a license from the food controller for each kind of breakfast food or cereal manufactured. License fees ranging from $10 and upwards are to be charged.

Wholesale and retail dealers will not be required to secure a license for the sale of breakfast foods, or cereals manufactured under license of the food controller.

Dutch are Cautious

In the second chamber at the Hague, war minister De Jonge, in answer to a question, said that in order to protect Dutch frontier towns from damage by air raids the Dutch flag will be flown from church steeples but no effective protective measures has been found for night time. Foreign governments, he added, have not refused to pay compensation for damage done by their airmen.

Fire Water Only

Clerk (in small town hotel)—Will you have a pitcher of water sent to your room, sir?

Colonel Bluegrass—Water? What for? Ain't there any fire escape?

Appeal For Aid

Monitor, Alta., Jan. 17, 1918.

Dear Friends & Fellow Workers:

I have just received a letter from Rev. S. T. Bartlett, Gen. Secty of Sunday Schools & Young People's Societies, Toronto, asking me to do all I can to raise some money by Jan. 31st, for the Canadian Committee for Armenian and Syriac Relief. This money is to go direct to help save the lives of two and a half million who are starving, mostly Armenian and Syrian woman and children.

The United States and other governments appropiate millions of dollars for relief of women and children of France, Belguim, and other lands, but the Armenians, Syrians and Greek Christians of Western Asia, are scattered races to which the various Governments cannot make a loan.

Exiled from their homes, robbed of their possessions, wanderers in a desolate land, their only hope for the barest necessities of life is in American charity.

They are an innocent, industrious people and ordinarily are the wealth producers of the land.

I also received a picture of a dear little girl. Above the picture reads, "You won't let me starve, will you?" Underneath the picture reads—I am little Shushan, from Armenia. My home has been destroyed, Father was taken away, Mother starved because she gave me all the food I am so hungry and cold.

Thousands of other children are hungry and cold too.

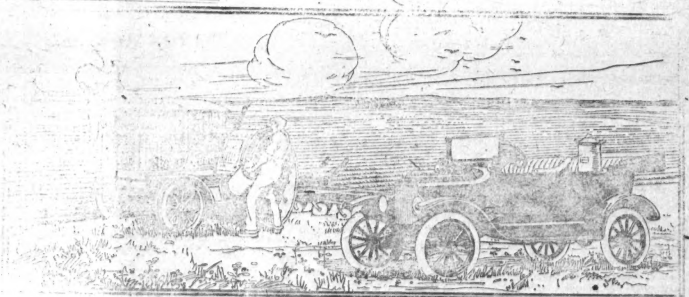
The letter states that 17 cents a day, $5 a month, $60 a year will save a life.

I shall be glad to receive any money from any person who wishes to help these people, and I will send it away after Jan. 31st.

Yours Sincerly
Ida Earl Haines
Monitor, Alta.

Rev. W. S. Wickenden, B. A. will conduct Divine Service (D. V.) on Sunday next, as follows:
Monitor 3 p. m.

All welcome.



The Ford is Now Considered a Necessity for Large-Scale Farming

WHETHER you are doing work on a large scale, or a small scale, you endeavor to reduce the delays of your farm machinery to a minimum and save time. A Ford will assist you in doing these two things.

If your tractor runs short of gasoline, the Ford will bring a few cans right to the spot and greatly shorten the delay. Or if you need a repair, or some new plow points, you can "run" the errand to town and back in one-third the time it would take with a horse and rig.

With a Ford you can supervise the work on your ranch much more thoroughly. You can get your mail and supplies oftener, and take more enjoyment out of prairie life. A Ford will do all these things and many more, and at the same time save you money.

The strength and endurance of the Ford has been proved the world over. It is equal to the western roads and the distances.

The Ford is *the* car for the Western Farmer.
